

# WHEN WAS YOUR LAST **PAP TEST?**

**Cervical cancer is preventable** with regular screenings and HPV vaccination.<sup>1,2\*</sup>

**Talk to your doctor** today about **co-testing** with **Pap + HPV**.

Studies show **95% of cervical cancers** are **detected** by testing with **Pap + HPV** together (Co-testing).<sup>2,3</sup>

**Keep it easy:** Make your screening **easy to remember. Schedule it on** or near a memorable event, such as **a birthday or holiday.**

\*As many as 93% of cervical cancers could be prevented by screening and HPV (human papillomavirus) vaccination.
